

DiadSea

The DiadSea project aims to foster transnational cooperation in the Atlantic Area, to enhance the sustainable management and conservation of diadromous fish in marine habitats.

We will achieve that through...

Biological data collection

Assessment of priority areas for conservation

Innovative methods to fill gaps in data-poor species

Transnational management of diadromous fishes

Tools for capacitation and capitalisation towards diadromous fishes sustainability

Don't miss anything about the project!
